Final Announcement

Greeting from Head Director of Fatmawati General Hospital

We are glad to inform you that the **Update Management of Urinary Incontinence**, will be held on May 25th – 26th, 2012 in Jakarta.

This event was held to celebrate the 51st anniversary of Fatmawati General Hospital on April 15th, 2012. Fatmawati General Hospital is a Class A teaching hospital. Our vision to be : the Leading, Comprehensive, and Reliable hospital in Indonesia. Our hospital are organizing comprehensive health services to the community in the form of promotive, preventive, curative, and rehabilitative. Since 2007 Fatmawati General Hospital had obtained the status of full accreditation of 16 services and since 2008 established the Orthopaedic and Medical Rehabilitation as its leading services.

The International Continence Society (ICS) is a multidisciplinary association, founded in 1971 with the aim to promote continence care worldwide. Since, the ICS had helped to organize many courses/symposia for physicians, nurses and physiotherapists by sending experienced teaching staffs to many countries in Asia. In implementing hospital rules as center for medical services, education, and research, Fatmawati General Hospital in collaboration with ICS has organize educational course by presenting speakers and experienced instructors to explore the problem of incontinence and updated treatment comprehensively. This educational course also endorsed by the Continence Society of Indonesia and The Indonesian Physical Medicine and Rehabilitation Association.

Welcome to the course and symposium, we sincerely hope that you will find your participation in these workshop and symposium a rewarding and enjoyable experience. Looking forward to have you in this prestigious event.

With warmest regards

Andi Wahyuningsih Attas, MD

Welcome Message

Dear Colleagues,

On behalf of the Organizing Committee, I welcome you to the **Update Management of Urinary Incontinence**, which will be held on May 25th – 26th, 2012 in Jakarta.

Urinary incontinence is a symptom experienced by many patients, a very disturbing day-to-day activities, causing anxiety and embarrassment and hence degrade the quality of life. Urinary incontinence has various causes. Therefore a careful assessment is needed to establish a definite diagnosis, so that proper management could be given. Hence the role of multidisciplinary collaboration of various disciplines is very important. The general purpose is to provide optimal incontinence care services with special purpose to raise awareness of the incontinence problems, ability to make accurate diagnosis and comprehensive treatment, also to improve the knowledge and skills of the nurses and physiotherapists handling cases of urinary incontinence. Please kindly mark the date of May 25th – 26th, 2012 in your agenda and join us in Jakarta for Update Management of Urinary Incontinence.

Kartini, MD

Chairman
