

ICS Regional Meeting 2018: Europe

30 November - 1 December. Brussels, Belgium

A pragmatic approach in refractory and complex neurogenic bladder problems

www.ics.org/regional

A pragmatic approach in refractory and complex neurogenic bladder problems

We invite you to a concise and provocative programme on neurourology, offering parallel tracks for MDs and Allied Health Professionals:

- ▶ Physicians will explore challenging situations in refractory neurourological cases seen in their daily practice
- ▶ Nurses and physiotherapists will review and share experiences on the clinical situations they encounter most frequently
- ▶ Sessions will cover surgical tips and tricks, disease specific treatments or issues (e.g. Parkinson's disease), and management of comorbidities in our neurogenic patients such as obesity or sleep disorders
- ▶ Plenty of time for questions, discussion and networking in a more intimate environment

Welcome to Brussels, “where evidence meets experience!”

Dirk De Ridder
Meeting Chair

Karel Everaert
Scientific Co-Chair

Emmanuel Chartier-Kastler
Scientific Co-Chair

Register now from just €140

Programme highlights

The Regional Meeting chairs have curated an international line-up of inspirational speakers from various disciplines who will take to the stage and engage with delegates. In the true spirit of any ICS multidisciplinary event, delegates are welcome to join any session in either of the tracks.

Here's just a taste of the sessions you can look forward to:

Track 1: Doctors

- ▶ **Obesity as comorbidity in Neurogenic bladder management**
Dirk De Ridder
- ▶ **Bladder augmentation: when and how**
Sherif Mourad
- ▶ **Effects of physical activity in neurological patients**
Pierre Denys
- ▶ **Surgery in neurological patients: tips and tricks**
Emmanuel Chartier-Kastler

Track 2: Nurses / Physiotherapists

- ▶ **Neurourology for nurses and physiotherapists**
Stefan De Wachter
- ▶ **Conservative management with products**
Mandy Fader
- ▶ **Early recovery programs in neurological patients: are they feasible?**
Michel Wyndaele
