ADVANCES IN UROGYNECOLOGY 2019

NEW HORIZONS, OLD MYTHS!

15, 16 & 17 November 2019
KIMS HOSPITAL
Auditorium, 15th Floor, Secunderabad.

URODYNAMICS WORKSHOP (ICS APPROVED) | 14 November 2019 | 9.00 am - 5.30 pm

COURSE DIRECTORS

Dr Pawan Vasudeva
M.S, M.R.C.S., M.Ch
EAU, JUA, AUA Fellow

Dr Ulrich Mehnert
MD, Consultant Urologist &
Neuro_Urology, Switzerland

Dr Jure Tornic
MD, Consultant Urologist &
Neuro_Urology, Switzerland

COORDINATORS

Dr Nirmala
MD, DNB, CU

Dr Arabind Panda
MS, MCh, Sr. Consultant
Urologist KIMS

Dr N Upendra Kumar
MS, MCh, Sr. Consultant
Urologist KIMS

"The glory of medicine is that it is constantly moving forward, that there is always more to learn"
- William J Mayo

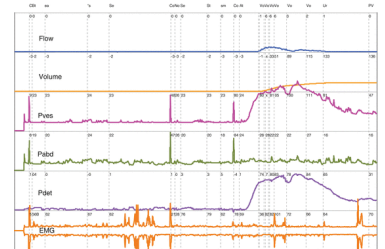

It is with great pleasure that we invite you to this workshop on Urodynamics, a joint endeavor by UPIA (Urogynaecology, Pelvic floor dysfunction and Incontinence Association) and the department of Urogynaecology and Urology, KIMS Hospitals Secunderabad, which has been approved by International Continence Society.

Urodynamics is an important tool in the armamentarium for evaluation of women with Lower Urinary Tract Symptoms (LUTS). The validity of this test lies in appropriate setting up and calibration of the equipment and a learned interpretation.

Lack of modular training opportunities in India and other developing countries, besides failure to have a multidisciplinary approach has kept Neuro-Urology an ignored entity even today despite extensive advancement in this sub-speciality in the developed world. Recognizing this need, we intend to provide a practical course with an interactive environment for the practitioners to improve their basic and advanced clinical skills in Urodynamics.

The program has been meticulously designed by the august faculty with focus on Urodynamics in women with LUTS. There will be a mixed bag of-

- Didactic lectures from world renowned faculty of ICS which will include live practical demonstration of the entire procedure (following ICS modules)
- Role of invasive urodynamics in specific conditions
- Indian guidelines vs the Western
- Discussion of challenging cases
- Video urodynamics and their clinical implications.

At the end of the course, we hope that the participants will be able to confidently set up of their own equipment, trace artefacts, conduct the study as per Good Clinical Practice guidelines, trouble shoot and interpret the traces.

We request all practitioners dealing with female LUTS to make use of this unique opportunity and get a thorough working knowledge on Urodynamics and in turn better patient care.

So do register, attend, interact, learn and Master the study of Urodynamics!

ANYONE WHO KEEPS LEARNING STAYS YOUNG.

-HENRY FORD
