This Urinary Incontinence surgical training weekend in the centre of Bristol, England, is a unique opportunity to get exposure to a range of training and surgical techniques surrounding stress and urgency urinary incontinence. You will have several hours of practice on the fresh frozen cadavers covering such topics as synthetic and non-synthetic treatment of stress urinary incontinence, BOTOX into the bladder and sacral neuromodulation placement for urgency urinary incontinence. This course is aimed at senior trainees about to start their consultancy position or early career consultants.
